

I wish to voice my opposition to limiting the broadcast content of satellite radio.

HR4026 and the National Assn. of Broadcasters attempt to limit satellite radio content deprives me of useful information and in effect limits my ability to enjoy my first amendment rights and to enjoy a information service I have come to rely on for traffic information, news and of course entertainment.

The best business and government practices are those which support a free and open market. Please do not move to protect selected broadcasters at the expense of my rights to enjoy the full range of satellite radio, and potential future broadcast services that may come about.

Respectfully,

Frank Wernlein
